Corporate Overview

LifeSize High Definition Video Communications Product Suite

Clear. Simple. Intuitive.

Our comprehensive product suite enables high definition video communications that make voices, viewpoints and expressions come to life. LifeSize offers a complete range of high definition video communications solutions with telepresence quality and are absolutely simple to use. Share multimedia in high definition and connect to multiple sites around the world over standard networks. LifeSize provides high definition at 1Mbps and better quality at any bandwidth.

Video

Across our product portfolio, the one feature that doesn't change is the quality of the experience. LifeSize allows you to choose your video system based on the features you want without jeopardizing the HD quality experience.

LifeSize High Definition Video Communication Solutions Portfolio

Audio

LifeSize® Phone™ – An authentic telepresence experience requires high definition audio. Built with 16 omni-directional microphones, LifeSize® Phone™ delivers revolutionary audio conferencing sound quality and room coverage. Dial audio or video calls from the phone interface. LifeSize Phone is interoperable with popular IP PBXs for easy management and integration. Compact LifeSize® MicPod™ also available.

Infrastructure

LifeSize® Transit™ – A complete firewall and NAT traversal solution that enables video calls within and across enterprises and organizations by securely traversing firewalls. LifeSize Transit is SIP-based and provides signaling, media and registrar services. Supports up to 20 simultaneous calls up to 1Mbps.

LifeSize® Networker™ – An all-in-one, enhanced gateway. Provides connectivity between IP and circuit switched networks. Multiple compact interfaces in one unit: 1x LAN/Ethernet; 4x BRI (ISDN); 1x PRI (ISDN).

LifeSize® Gateway™ – An enterprise-class high definition ISDN to IP gateway that makes dialing and connecting easy and cost-effective. Completely managed through an intuitive web-based user interface.

LifeSize® Multipoint™ – A high definition multipoint control designed to support high quality multi-site conferencing, available in 12-port and 24-port configurations. LifeSize Multipoint is standards-based for interoperability with a wide range of systems and can be managed through a web-based interface.

Management

LifeSize® Control™ – management software to manage multi-vendor video devices. Provides secure, real-time management and workflow, Web-based scheduling, on-demand reporting and export to PDF, and centralized software upgrades. Built on Microsoft.NET® platform with industry standard RDBMS.

LifeSize® Gatekeeper™ – IP communications software that provides comprehensive, intelligent management of IP telephony and video communications networks. Register MCUs, gateways and endpoints using a web-based user interface.
